

List of already surveyed frame systems for the u::Lux Switch

Errors and modifications are reserved!
Status: 23.06.2015

The following list serves as rough orientation to distinguish between appropriate and inappropriate frame systems for u::Lux. The final choice of the frame and the remaining electronic installations (connectors, network-/phone plugs, etc.) are a question of personal preferences, because resulting extensions e.g. that the u::Lux Display extends over the frame system could be perceived as intended and beautiful or it could be perceived as unintended. We have added images to the list, therefore you can obtain an initial visual impression. We recommend to get one example of the frame as sample and make the final decision to this base.

Manufacturer	Switch range	Model	Designation	Manufacturer-Nr.	approx. Price	Additional colours	Frames		Crossbar	Characteristics	Offered Versions	Notes	Manufacturer links
							Min	Max
